

AlfaMag Electronics

Product Overview

SP Series Switching Power Supplies

Standards available from 3W to 60W, and custom designs available up to 1000W. Smaller watt designs available in wall mount or open frame style. Larger watt designs available in open frame or desktop style. The standard line includes UL and CE recognitions, EMI Class B Filtering, Overvoltage and Short Circuit Protection. RoHS Compliant supplies available upon request. For custom designs, please visit our website and fill out the custom power supply form. Our engineering staff will be glad to help with your design requirements.

Magnetic Components

AlfaMag is the authorized North American agent for the International Talema Group of companies. We carry all the high frequency component lines, including power inductors, common mode chokes, current sensors, telecom products, and networking products. Custom designs also available.

Most Popular Components

SW Series Inductors work directly with the National Semiconductors Simple Switchers.

50KHz * 150KHz * 260KHz

ASM Series Current Transformers (50/60Hz)

CA Series Common Mode Chokes

MUJ Series ISDN Interface Modules

CMJ Series Interface Chokes

AS Series Current Transformers

MAJ Series Compact SMD Modules

DP Series Power Inductors

LP Series SMD Chokes

All Components RoHS Compliant

Please check our Product Index on our website for all electrical and mechanical specifications.

AMPT Series EI Laminated Transformers

Standards available from 50VA to 500VA, and custom designs available up to 1KVA. All standard and most custom designs are UL Recognized components and are available RoHS Compliant.
